CURRENT SITUATION

(Recent updates are posted at the top of Current Situation)

On April 2, 2019 at 7:45 p.m., The City of Riverside Fire Department dispatched a first alarm structure fire assignment to 10600 block of Rossbo Avenue for reports of a working structure fire. Engine companies upon response from their stations reported smoke showing. The first due chief officer immediately requested an additional engine company and an AMR unit to respond. Firefighters arrived on scene and discovered a fully involved outdoor shed to the rear of the residential house with two immediate exposures and a downed powerline. The Battalion Chief had Riverside Dispatch perform a roll call with a life safety check back to all units on scene and responding to copy down powerlines. The roll call was performed with all units acknowledging. RPD was requested for immediate traffic control. The fire was quickly extinguished. It was discovered that a person had been living in the shed with non-compliant construction along with non-compliant electrical to the shed. Utilities were requested to the scene. The area of hazard was flagged off. Personnel on scene were shown the location of the down power line. The on duty investigators were on scene on and they conducted the preliminary fire investigation and the cause was undetermined more than likely electrical. A requested for Code Enforcement was placed to have them respond to the incident in the morning during their normal business hours. There were no civilian or firefighter injuries. Estimated damage is \$10,000 with a save of \$400,000. Pictures courtesy of Miguel Manzaners from the Facebook Group ¿What is Going on in Riverside County?¿
